Continuation of 11. does NOT place the application in condition for allowance because: Applicants arguments have been fully considered but have been found unpersuasive for the following reasons. Applicants refer to the Marik reference as "teaching away" from the combination formed in the rejection. Marik teaches software to debug an 8031 system without the need for an in-circuit emulator and its associated hardware. Marik DOES NOT TEACH THAT IN-CIRCUIT EMULATORS ARE UNDESIRABLE. Marik does not "teach away" from in-circuit emulators. Marik teaches an improvement to in-circuit emulators that requires less hardware than the prior art. Where the prior art teaches a hardware in-circuit emulator with desirable features not taught by Marik, a person of ordinary skill in the art would be motivated to combine that in-circuit emulator with Marik because Marik does not "teach away" from in-circuit emulators because Marik does not disclose that in-circuit emulators are undesirable. Indeed, Marik intends to IMPROVE upon in-circuit emulators (by providing similar functionality in software), not "teach away" from in-circuit emulators as Applicants allege.

Applicants' argument that Marik "teaches away" from in-circuit emulators was first submitted on 26 April 2007. This argument was first found unpersuasive in the Final Rejection entered on 23 July 2007. This argument has been fully considered and is found unpersuasive.
